DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-25, drawn to a charge injection assembly.

Group II, claim(s) 26-29, drawn to ionizing radiation module.

Group III, claim(s) 30-37, drawn to X-ray imaging module.

Group IV, claim(s) 38-41, drawn to a flat panel digital X-ray image detector.

Group V, claim(s) 42-43, drawn to an ionizing radiation imaging module.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I discloses an elongate charge injection assembly and its particular electrodes. The invention of Group II discloses a multilayer radiation imaging module comprising a multilayer ionizing radiation sensitive element and a charge injection assembly, however it does not require any of the specifics of the charge injector of Group I. The invention of Group III discloses an X-ray imaging module including a multilayer sensor element, however it does not require the specific layers as disclosed in the invention of Group II. The invention of Group IV discloses a flat panel digital X-ray image detector without the characteristics of the sensor of any of the Groups II, III. The invention of Group V discloses an ionizing radiation imaging module including a radiation sensor and a charge injector, however it does not require a multilayer ionizing sensing element nor any of the specifics of the injector of Group I.

Art Unit: 2878

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
